SUMMARY

Product and visual designer with 8 years across UI/UX, brand, motion and 3D, who now designs **and builds** AI products end to end. I founded 35 Ai Agency, a done-for-you AI marketing studio for small businesses, and built its engine myself: 20 specialised AI agents behind an automated quality gate, API publishing, a client-facing assistant and personalised video outreach. Before that I built Sunny, a bilingual phone and chat AI navigator, and designed enterprise UI at Accenture. I prototype in code with Claude Code, test with real users and data, and explain results in plain language.

EXPERIENCE

35 Ai Agency | Founder, AI Product Designer & Builder 09/2026 – Present

Done-for-you AI marketing studio for small businesses · Hamilton, ON · 35aiagency.com

- Designed and built the agency engine in Claude Code: 20 specialised agents (research, brand, creative, video, analytics) behind a quality gate of machine checks, an AI creative-director score and up to 3 automatic retries before human review.
- Run the production stack on a Linux server: n8n workflows, Telegram approval bots, scheduled publishing to Instagram, TikTok and LinkedIn through APIs, daily preflight checks, missed-post alerts and encrypted nightly backups.
- Designed and built Maya, a client assistant on the Claude API with tool use: owners approve posts and changes by tapping cards; proactive nudges and voice input.
- Built a personalised outreach system: one spec file per prospect becomes a cloned-voice script (ElevenLabs), GSAP motion design rendered frame by frame with sound design, a self-check contact sheet and a personal landing page, in about 2 minutes per video.
- Designed and built the agency website and per-client case studies (GSAP, Lenis), plus interactive prospect pages such as a working instant-estimate, support and hotline demo for a security installer.
- Delivered branding, AI product photography, content and Google profile fixes for 4 small businesses and signed the first paying client; content tests showed face-visible posts drew 5–10× the views.

Megability | Founder & Creative Technologist 06/2026 – Present

Early-stage AI startup · Hamilton, ON · megability.ca

- Designed, built and tested Sunny, an AI parent navigator that answers by phone and website chat in English and French (Voiceflow, Claude Code), with SMS links and booking via Calendly, Google Calendar and Jane.
- Wrote the conversation design and safety guardrails: ask before answering, never diagnose, route emergencies to 911, never invent numbers, prices or hours.
- Ran scripted and live test calls and chats, logged 11 issues across speech, SMS, booking and routing, fixed 9; repositioned the product from AI receptionist to parent navigator after clinic interviews.
- Built the marketing site and reusable clinic website templates with the chat embedded, and produced promo videos in Remotion.

Accenture | UI/UX Designer 02/2025 – 05/2026

Toronto, ON

- Designed UI for the TIAA financial services app, turning requirements and wireframes into responsive, accessible web and mobile screens.
- Applied and extended reusable components in the product's design system to keep screens consistent across teams.

FlowMaestro | Web/UI Designer (Contract) 09/2023 – 11/2024

AI workflow automation platform · Toronto, ON

- Defined the visual and UX direction for landing pages in light and dark themes; developers built from the Figma direction without extra screens.
- Built reusable Figma components and designed social and ad banners; Maze usability tests improved task success by ~20%.

IoM Media | 3D Modeler 06/2022 – 06/2023

Halifax, NS

- Delivered 100+ characters, props and environments for "Caillou" and other animated series in Maya and ZBrush, working with rigging, animation and surfacing teams.

Guru Studio | 3D Modeler 01/2022 – 04/2022

Toronto, ON

- Modeled characters, props and modular sets for "Dino Daycare" from style guides for layout and pre-vis teams.

Vaughan International Film Festival | Senior Graphic Designer 10/2020 – 11/2021

Vaughan, ON

- Led the visual direction of festival campaigns across digital, social and print; created motion graphics, posters, programs and decks with marketing and event teams.

Trenders Team | Graphic Designer 02/2018 – 03/2020

Baku, Azerbaijan

- Created brand identities, logos, packaging and print, social and digital campaigns for diverse clients.

SELECTED WORK · GULNAR-PORTFOLIO.VERCEL.APP

35 Ai Agency: AI agent system with a quality gate, agency site, outreach video template.

Un-Muted: generative AI campaign concept: locked character, film, 4 formats, 3 languages.

Sunny: bilingual phone and chat AI navigator with guardrails and booking.

FlowMaestro: landing page direction for an AI automation platform.

SKILLS

AI product & automation: agent design (chat and voice), conversation design, evaluation and quality gates, prompt engineering, tool use, n8n, APIs and webhooks, Telegram bots, voice cloning and TTS, generative image and video pipelines

Product & UX design: UX/UI, design systems, prototyping, usability testing (Maze), accessibility, web and landing pages, brand identity, art direction

Motion & 3D: GSAP, Remotion, After Effects, social video and kinetic type, Maya, ZBrush, Substance Painter

Build (AI-assisted): Claude Code, HTML/CSS/JS, React, Python scripts, Git/GitHub, Vercel, Linux server

Tools: Figma, Voiceflow, Claude, ElevenLabs, Magnific, Higgsfield, Canva, Adobe Creative Suite, Webflow

EDUCATION

Diploma in 3D Animation, Seneca College, Toronto 2021

Master's in Journalism, Baku State University 2015

Bachelor's in Literature, Baku State University 2013
